Copyright and Your Rights

The author retains the copyright in this book. By downloading a copy of this book from the Semaphore Press website, you have made an authorized copy of the book from the website for your personal use. If you lose it, or your computer crashes or is stolen, don't worry. Come back to the Semaphore Press website and download a replacement copy, and don't worry about having to pay again. Just to be clear, Semaphore Press and the author of this casebook are not granting you permission to reproduce the material and books available on our website except to the extent needed for your personal use. We are not granting you permission to distribute copies either.

We ask that you not resell or give away your copy. Please direct people who are interested in obtaining a copy to the Semaphore Press website, www.semaphorepress.com, where they can download their own copies. The resale market in the traditional casebook publishing world is part of what drives casebook prices up to \$220 or more. When a publisher prices a book at \$220, it is factoring in the competition and lost opportunities that the resold books embody for it. Things are different at Semaphore Press: Because anyone can get his or her own copy of a Semaphore Press book at a reasonable price, we ask that you help us keep legal casebook materials available at reasonable prices by directing anyone interested in this book to our website.

Printing A Paper Copy

If you would like to have a printed copy of the book in addition to the electronic copy, you are welcome to print out a copy of any part, or all, of the book. Please note that you will find blank pages throughout the book. We have inserted these intentionally to facilitate double-sided printing. We anticipate that students may wish to carry only portions of the book at a time. The blank pages are inserted so that each chapter begins on a fresh, top-side page.

Finding Aids and Annotations

Finally, please note that the book does not include an index, a table of cases, or other finding aids that are conventional for printed books. This is because a Semaphore Press book, in pdf form, can be searched electronically for any word or phrase in which you are interested. With the book open in Adobe Reader, simply hit control-f (or select the "find" option in the "Edit" pull-down menu) and enter the search term you want to find. We also enable Reader's commenting features in our pdf books, so you can highlight text, insert comments, and personally annotate your copy in other ways you find helpful. If your copy of Reader does not appear to permit these commenting features, please check to make sure you have the most recent version; any version numbered "8" or higher should permit you to annotate a Semaphore Press book.
